Ensuring Colour Consistency between designs, Interface Builder and UIColor

You can restrict access to a stored property's setter:

```
public private(set) var name: String
```

The first **public** refers to the access level for the getter and the second **private(set)** refers to the access level for the setter

Swift - Shared by **@casey** - July 21

Xcode 9 *does* actually have code folding.

⌘-click a function > Fold

⌘ + Option + left arrow will fold the scope right will unfold

Xcode - Shared by **@casey** & **@adamc** - July 25

Røde is actually an Australian company... their first microphone sold “like a rat up a drainpipe” so they made up the name “Røde NT-1” just so it could be called rodent.

TheMoreYouKnow - Shared by **@adam** - Aug 7

The Progress class

```
- (void)startTaskWithData:(NSData *)data {
    NSUInteger batchSize = ... use a suitable batch size
    NSProgress *progress = [NSProgress progressWithTotalUnitCount:batchSize];

    for (NSUInteger index = 0; index < batchSize; index++) {
        // Check for cancellation
        if ([progress isCancelled]) {
            // Tidy up as necessary...
            break;
        }

        // Do something with this batch of data...

        // Report progress (add 1 because we've completed the work for the current index).
        [progress setCompletedUnitCount:(index + 1)];
    }
}
```

Hipster - Shared by **@casey** - Aug 16

Countdown of indexing files

```
defaults write com.apple.dt.Xcode IDEIndexerActivityShowNumericProgress -bool true
```

Defaults write - Shared by **baz** - Sept 2

Remove all untracked ignored and non-ignored files:

```
git clean -fx
```

Remove all untracked directories:

```
git clean -fd
```

git - Shared by **@benthomas** - Sept 5

You can now toggle invisible files in Finder with:

⌘ + SHIFT + .

(Also works in Save dialogs)

macos - Shared by @jeanetienne & @huwr - Sept 6

In interface Builder, Option-clicking the **Embed in Stack** button at the bottom of the screen brings up a menu which allows you to unembed a stack.

"It's even nicer in Xcode 10 where you can embed in view and scroll view from that button as well"

Xcode - Shared by **@casey** & **@mattdelves** - Sept 9

TIL you can copy paste files between one mac and another with hand off

macos - Shared by **@huwr** - Sept 11

TIL alt + drag file in Xcode to duplicate the file 🙈

Xcode - Shared by **@baz** - Sept 11
